

Robot Vacuum

Create your own mini robot vacuum that moves around and blinks! While this robot vacuum won't actually clean your home it will still entertain cats.

Written By: Joshua

INTRODUCTION

Create your own mini robot vacuum that moves around and blinks! Just add a Self Sticking Vibrating Motor, 5mm Blinking LED, a CR2032 battery, and some Maker Tape. There's a full-color version as well as a black & white version that makes a great coloring activity.

You can make this project (and many more!) with our **Origami Circuits Kit**.

TOOLS:

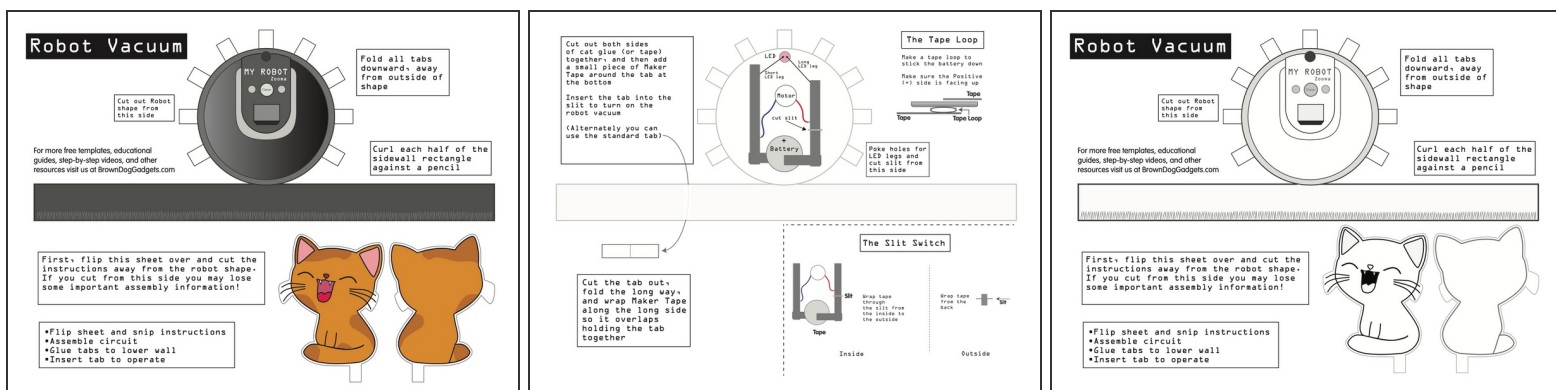

- [Scissors](#) (1)
- [Clear Tape](#) (1)

PARTS:

- [Origami Circuits Kit](#) (1)

Step 1 — Tips and Tricks

- There are two versions of this template, one that is full-color and one that is black & white so you can color it yourself.
- The LED is optional. We used a blinking red LED which can be found in the **Origami Circuits Kit**.
☒ If you do choose to use an LED we recommend **red** or **yellow**. Using colors such as blue or white will sometimes cause the motor to not spin.
- For extra fun, cut out the paper cat and use it for the switch!
