

Kalima! Valentine's Day Card

Celebrate Valentine's Day through the act of giving your heart to someone you care about.

Written By: Joshua

INTRODUCTION

Celebrate Valentine's Day through the act of giving your heart to someone you care about. We have two versions of this template for download at the bottom of this guide. Both use a blinking red LED to symbolize the beating of a loving heart.

You can make this project (and many more!) with our **Paper Circuits Kit**.

TOOLS:

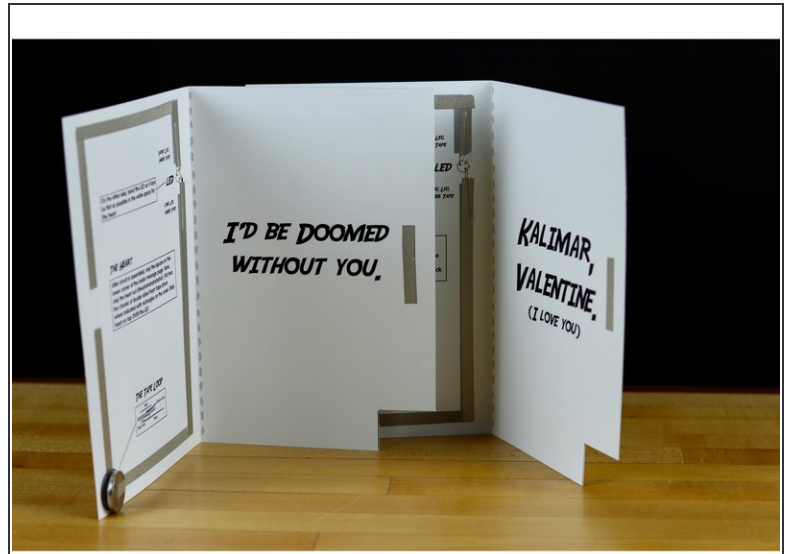

- [Scissors](#) (1)
- [Clear Tape](#) (1)

PARTS:

- [Origami Circuits Kit](#) (1)

Step 1 — Tips and Tricks

- Poke your blinking red LED through, add Maker Tape, and then add battery.
- Cut out the small stand offs and heart from the side. Fold and glue into position above the heart.

⚠ Don't fall into any open pits of lava or ride any mining carts through caves. This may cause issues with the LEDs.
