## INTRODUCTION

These are 3D Printed LEGO Compatible parts that make building a Gripper mechanism easy.

---

### TOOLS:

- [3D Printer](#) (1)
-

## Step 1 — Download and Print

- You can download the files and print them on your own 3D Printer.
- Find them in our GitHub repository: <https://github.com/BrownDogGadgets/3D-Pr...>
- There is a full assembly guide here: [LEGO Gripper \(with 3D Printed Parts\)](#)

## Step 2 — Tips & Tricks

- Every 3D printer is a little different, and may not be as well calibrated as it should be. If you find parts a bit too loose or tight we recommend trying to print at 101%, or 102% or increasingly smaller by a percent. That may be enough to help them fit properly.
- **Note:** If you are comfortable editing OpenSCAD files we've provided the source for you to make any needed changes: <https://github.com/BrownDogGadgets/3D-Pr...>
