Step 1 — Download and Print

- You can download the file and print it on your own 3D Printer.

- Find it in our GitHub repository: https://github.com/BrownDogGadgets/3D-Pr...

- Or on Printables.com: https://www.printables.com/model/280587-...

- Or Thingiverse: https://www.thingiverse.com/thing:552433...

- We have two versions available; one for 5 batteries and one for 10 batteries.
  - We've also provided the OpenSCAD file if you want to customize it for some other quantity.

Step 2 — Tips & Tricks

- The batteries snap into the holder but can be easily removed by pressing on the battery from the bottom of the holder to pop it out.

⚠ Every 3D printer is a little different! If your part doesn't fit properly here are a few things to try.

  - Part too tight? Try sanding it or cutting away some material with a knife.

  - You can also try printing it at slightly more or less than 100% scale. to adjust how tight it is.

  - If you're comfortable editing the OpenSCAD file you can make further adjustments.
