

Light-Up Halloween Bracelets

Make a Halloween themed version of our popular LED wearable bracelets project. Choose from three different templates or make your own!

Written By: Natasha Dzurny

INTRODUCTION

Make a Halloween themed version of our popular LED wearable bracelets project. Choose from three different templates or make your own!

You can make this project (and many more) with our **Wearable Circuits Kit**.

TOOLS:

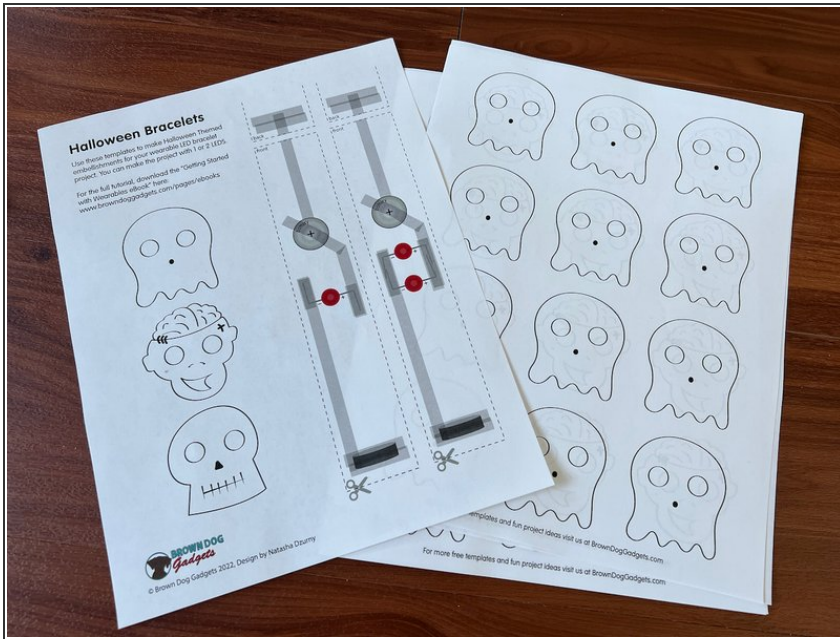

- [Scissors](#) (1)

PARTS:

- [Wearable Circuits Kit](#) (1)
- [Felt](#) (1)

Step 1 — Download the Template

- This is a Halloween version of our popular LED bracelet project from our [Getting Started with Wearables eBook](#).
- Download and print the template attached to this guide.
- The download features designs for both 2-LED and single-LED bracelets. This might be helpful if you'd like to limit the number of LEDs needed in a classroom environment.

Step 2 — Make a Ghost

- Cut out and trace the ghost template onto a piece of felt.
- Add a mouth with a black marker.
- Place the eyes over the LEDs on the bracelet.

Step 3 — Make a Skeleton

- Cut out and trace the skeleton template onto felt.
- Draw the nose and mouth with a marker.
- Place the skeleton over the eyes on the bracelet.

Step 4 — Make a Zombie

- Cut out the Zombie Template and trace it onto felt.
- Cut out the brain from pink felt and the eye patch (optional) from black felt. Use a marker to draw on the mouth and nose.
- Place the Zombie over the LED on the bracelet.

Step 5 — Alternate: Paper Version!

- Instead of transferring the project to felt, you could use markers to color in the template, and place the paper over the LED(s).
