INTRODUCTION

A simple LED circuit that makes your sweater light up - with the most bang for your "buck". Reindeer rejoice! Great for any holiday party.
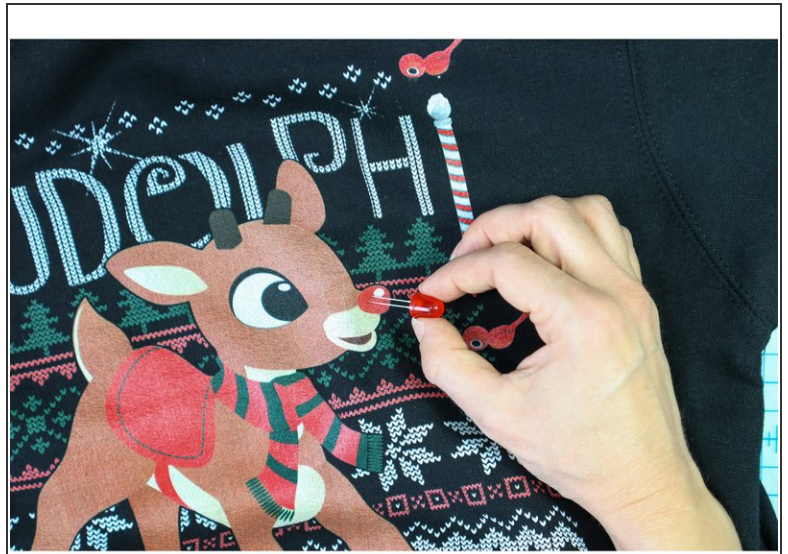

You can make this project (and many more!) with our **Wearables Circuits Kit**.

⚙ **PARTS:**

- Wearable Circuits Kit (1)
- Tape (1)
- Rudolph Sweatshirt (1)

This document was generated on 2023-01-05 11:18:29 PM (MST).

Step 1 — Insert the LED

- Insert a red LED through the shirt.

Step 2 — Insert the Battery

- Turn the shirt inside out.

- Insert a coin cell battery between the legs of the LED, matching the long leg to the positive (+) side and the short leg to the negative side.

- Peek at the front of the shirt - did the LED light up? If it did good! If it didn't, try flipping the battery around.

Step 3 — Tape the Battery in Place

- Use a piece of tape (transparent tape works best!) to secure the battery and LED legs together.

- Fold the battery down so that it lays flush against the back of the shirt, with the negative side touching the shirt.

Step 4 — Turn the Shirt Right Side Out!

- Turn the shirt right side out, and you're ready to guide the sleigh tonight!
