

Light-Up Paper Leprechaun Hat with 4-Leaf Clover

Make a Leprechaun Hat with 4-Leaf Clover that lights up when you put it on! Perfect for St. Patrick's Day.

Written By: Natasha Dzurny

INTRODUCTION

Make a Leprechaun Hat with 4-Leaf Clover that lights up when you put it on!

There's a full-color version as well as a black & white version that makes a great coloring activity.

You can make this project (and many more!) with our **Paper Circuits Kit**.

TOOLS:

- [Scissors](#) (1)
- [Markers, Crayons, or Colored Pencils](#) (1)
- [Printer](#) (1)

PARTS:

- [Paper Circuits Kit](#) (1)
- [Cardstock](#) (1)
- [Craft Foam](#) (1)

Step 1 — Print and Color the Template

- Print the template double-sided so that the circuit prints on the back of the design.
- If you choose the blank design, color it with crayons or markers.
- Cut out the design.

Step 2 — Create the Circuit

- Push the LED(s) legs through the project from the front, making sure the long leg goes through the "+" hole and the short leg goes through the "-" hole. Fold the legs as shown on the template.
- Follow the instructions on the template to cover the lines with Maker Tape.
- Before placing the battery, add a small loop of Maker Tape as shown.
- Wrap the Maker Tape around a foam rectangle. When the hat is worn, the switch will close and the LED will turn on!

Step 3 — Add the Hat Band

- Cut out the side strips and tape them to the hat with the slits facing up on one side and down on the other.
- Interlock the slits in two places to create the size that works for your head.
- Wear the hat and enjoy!
