

# **Penguin Template - Rover Body**

Turn the Bit Board Rover into a cute penguin with this printable template.

Written By: Natasha Dzurny

## **INTRODUCTION**

Turn the Bit Board Rover into a cute penguin with this printable template.

## **TOOLS:**

- Printer (to print out the template) (1)
- Scissors (1)
- Hole Punch (1)
- Double-Sided Tape (1)
- Glue (1)

## **PARTS:**

- Bit Board Rover Kit (1)
- micro:bit (1)
- LEGO Technic Pin with Friction Ridges and Slots (2780 / 61332) (4)

Included with Rover Kit

• LEGO Beam 1 (18654) (4)

Included with Rover Kit

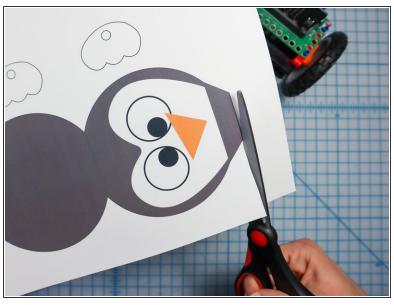

Cardstock (3)

## Step 1 — Print the Template & Gather Supplies

- If you haven't built the Rover's Main Body yet, see the <u>Rover Main Body</u> guide first.
- Print the template of your choice.
  - We've included both templates in the single PDF file attached to this guide.
- You will also need scissors, a hole punch, 4x LEGO pins (black) and 4x LEGO round beams (grey), and double-sided tape or glue.

#### Step 2 — Color and/or Cut out The Template

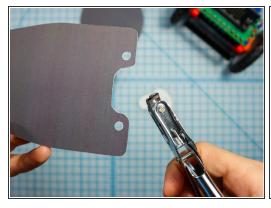

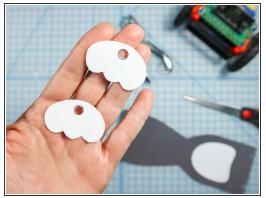

- If you chose the "Print and Color" template, color it in first, then cut it out.
  - Or, If you chose to print the "Print and Color" template on colored paper, cut out the pieces and tape them in place. (Finished example in the second photo)
- If you chose the grey "printable" template, cut out the template as shown.

## Step 3 — Punch Holes Where Shown

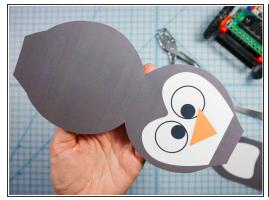

• Use a standard hole punch to punch out the circled where shown.

# Step 4 — Fold the Paper Cutouts

Fold along the dotted lines as shown.

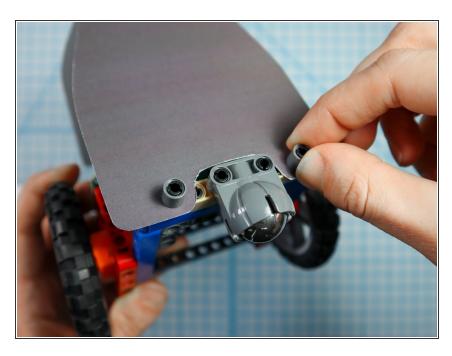

## Step 5 — Prepare the LEGO Pins

Connect each LEGO pin to a LEGO round beam as shown.

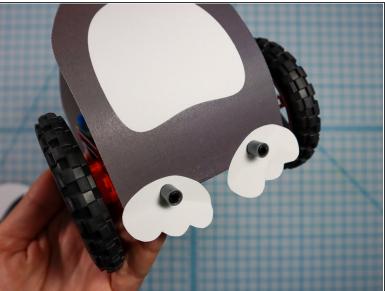

## **Step 6** — Use LEGO To Secure the Penguin Back

 Use two pin/beam sets to connect the back of the penguin body to the Rover.

## Step 7 — Add The Feet and Secure the Front

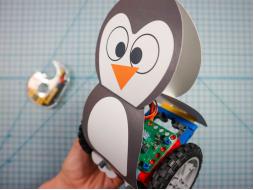

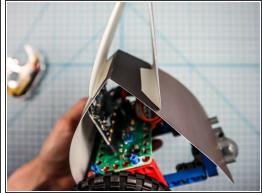

- Use two more pin/beam sets to attach the feet and front of the penguin body to the front of the Rover.
  - First, put the pin through the foot, then through the penguin body, then into the Rover body.

## Step 8 — Add the Head

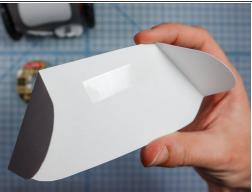

- Stick double-sided tape or glue to the bottom of the head flaps.
- Adhere the head to the body as shown.

## Step 9 — Attach the Wings

- Fold the wings along the dotted line.
- Add double-sided tape or a dot of glue to the center of the inside of the wings.
- Thread the wings behind the penguin's body and squeeze the spot with the tape/glue to keep them
  in place.

## Step 10 — Optional: Add Googly Eyes!

● The penguin's eyes are 1.5-inch circles - perfect for a set of Googly Eyes! Add them if you wish.

# Step 11 — You now have a Penguin Rover!

Let your penguin roam free!
